Skarbiec Law Firm has built its market position through activities that previously had no equivalent on the Polish market. Its offer combines legal and financial advisory services across the globe. We conduct cases that, due to their level of complexity and international nature, have so far been carried out solely by foreign consulting firms. As the only company in Poland, we provide comprehensive services for holding structures, including, among others, the following activities: asset management, transaction advisory, legal advice, tax advice, bookkeeping, crisis management, private banking abroad, inheritance planning. Skarbiec Law Firm helps in management of nearly 1,000 companies, foundations and trusts and other corporate vehicles, located in over 50 countries and territories, whose total asset value is more than \$2.5 billion and continues to grow. Typical services that we offer include: international tax planning, management of crisis situations (such proceedings with tax authorities), bankruptcy of the company, a hostile takeover or family conflicts. The scale of our law firm's activity extends across 1,800 institutional clients.

The quality of legal services provided by Skarbiec Law Firm was also awarded with a prize for effective handling of cases by *Gazeta Finansowa*. Skarbiec Law Firm is not afraid to make decisions, granting customers a clear recommendation and taking action that goes beyond the clichés. Skarbiec Law Firm represents numerous groups of clients whose interests have been violated by unlawful actions of state officials or competitors, such as administrative and tax decisions issued in violation of the law, inaction of authorities, arbitrary arrests, unfounded criminal or penal fiscal charges, unjustified harassment of entrepreneurs with tax and administrative controls, cases of corruption involving officials, acts of unfair competition. The Law Firm's clients

are primarily wealthy individuals that are looking for solutions for the protection of private property against the risk of claims related to their business activity, or are thinking about a long-term plan for the future of their family using solutions such as a private foundation or a change of tax domicile.

For entrepreneurs – both dynamically growing companies that think about international tax planning and traders particularly affected by the crisis, faced with bankruptcy, termination of credit agreements and forced debt collection by tax offices – our law firm is able to offer comprehensive assistance that goes beyond traditionally understood legal counseling and, if necessary, includes taking over the management of the situation.

Legal Advisor Robert Nogacki works actively to promote knowledge about the creation of flexible tax structures. He has been personally involved in tax advisory services on capital markets for many years. His active attitude and concrete actions to protect the interests of individual investors, resulted in the awarding of an honorary membership in the Association of WGI Wierzyciele (WGI Creditors), which brings together victims of the largest bankruptcy of a brokerage house in the history of the Polish capital market. Legal Advisor Nogacki provides legal support and works for the Institute of Consumer Education for the Capital Market, protecting the interests of consumers, who use brokerage services of banks or credit institutions. In recent years, the Institute of Consumer Education for the Capital Market has taken an active part in disputes and debates carried out on the Polish capital market, helping clients harmed by Amber Gold, Finroyal, Opluenti, Provident or in the so-called currency options scandal.
